PLANET OR PLASTIC ?

Bambrew is the solution for a better future. Every time you choose plastic, you're exploiting the environment. It takes nothing to say no before it is too late!

Bambrew started with an aspiration to make products to nurture a zero waste environment for the future, by narrowing the use of single-use plastic to reduce carbon footprint. As an alternative to toxic plastic, we use plant fibres and pulp to make our packaging solutions eco-efficient & renewable. Our team diligently strives to cultivate the importance of sustainable and eco-friendly substitutes. With our line of versatile options, businesses can replace their dependency on plastic for packaging and add towards a more sustainable and greener tomorrow. All our products are designed to bring into play sustainability and biodegradability to ensure a sound future.

Product Material

Kraft paper

Barrier coating (made from plants)

THE DAWN OF BAMBREW

Sowing the seeds of a sustainable future

BIODEGRADABLE

OIL RESISTANCE

WATER RESISTANCE

TEAR RESISTANCE

TAMPER PROOF

TEMPERATURE RESISTANCE
(UPTO 150°C)

MICROWAVABLE

VACUUM PACKAGING

FOOD GRADE

OXYGEN BARRIER

NITROGEN FLUSHING

HEAT SEALABLE

PRODUCT USP's

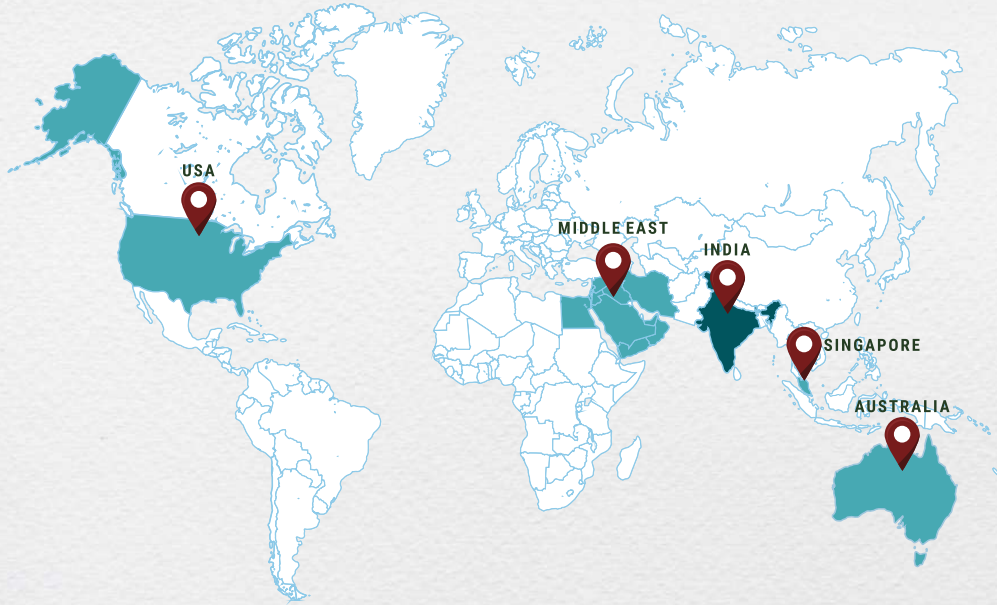

We are a warrior in green armour because we're all saving the world from environmental crises.

We fabricate the products essentially to curtail the use of non-biodegradable material.

THE PRODUCT JOURNEY

The various stages of our product cycle that represents the process of crafting our bamboo alternatives, starts and ends with an eco-friendly approach.

OUR PRESENCE

We are present in 5+ countries and 25+ cities.
